

Saumya Somapalage

IT Student

Relevant Projects & Coursework Integration

About Me

Third-year Information Technology student at Metropolia University of Applied Sciences, specializing in IoT and Networks. Armed with a strong practical foundation in C/Python programming, embedded systems, secure enterprise networking, and server administration. Highly motivated, analytical, and eager to apply technical knowledge in modern IoT, cloud, and networking environments

SKILLS

- Networking & Systems: Routing & switching, secure enterprise networks, Windows & Linux servers, virtualization, cybersecurity operations.
- IoT & Embedded: Microcontrollers, sensors, C programming, embedded systems, IoT security. Programming:
- Python, C, Linux basics.
- Cloud & Data: Cloud fundamentals, machine learning basics, databases.

Language

- English – Advanced
- Finnish – Basic(learning)
- Sinhala – Native

• Enterprise Network & Security Lab Work (Academic)

01/2026 – 05/2026

- Configured and managed Windows and Linux servers, implementing secure enterprise routing and switching protocols.
- Applied IoT security principles and cybersecurity operations to harden connected device architectures.

• Embedded Systems & IoT Prototypes 10/2025 – 03/2026

- Built and programmed functional IoT prototypes utilizing sensors, microcontrollers, and C programming.
- Developed hardware control logic and processed real-time data for automated systems (e.g., Pill Dispenser, Heart Rate Detector).

• Cloud & Software Development 08/2025 – 12/2025

- Explored cloud computing fundamentals and machine learning integrations.
- Developed cross-platform applications and interactive systems using Python and JavaScript.

Education

Bachelor of Engineering & Information Technology

Metropolia University of Applied Sciences, Finland | 2024 – 2028

Higher National Diploma in Teaching (HND OE)

Sri Lanka | 2019 – 2022

Work Experience

Math and Science Teacher

Ministry of Education, Sri Lanka | June 2023 – June 2024

- Delivered structured lessons and explained technical concepts
- Maintained accurate documentation and reports
- Developed communication, organization, and teamwork skills
- Demonstrated responsibility, punctuality, and a service-oriented mindset
